

Instructions

for

Putting Flowers4MS Sticker on Car Window

1. The sticker goes on the outside of the rear window.
2. First make sure the window is clean – clean – use Windex and paper towels to make sure it is clean so the labels holds good. OK – now you are ready to begin.
3. Before you start to peel away the back paper, hold the whole label on to the window in a place where it is level, centered and does not block your view. Have someone hold it while you look in the rear view mirror. OK.
4. Once you have the position located, just mark it with a piece of tape on each end.
5. Now, peel the backing away from the letters carefully and slowly watching so that you do not leave any letters or

dots behind on the backing. Keep the two ends of the label separated so they don't stick to each other.

6. Holding the two ends of the label, place it on the window in the place where you marked with tape. Be slow and careful not to get bubbles – work from one side to the other pressing down the letters with the paper as you go.
7. Once you can see all the letters are pressed down, start to peel away the paper slowly starting from one side and using a rocking motion and again – watch that you don't leave any dots or letters behind. You may have to help it along in spots but it does work really well.

That's it!! – You are done

Now wherever you go, whenever you are stuck in traffic – even when you are parked

at a store – you will be spreading the word of Flowers4MS and you will be one of Angela's Angels.
